Software Developer
Adiacent - Cagliari

Full Stack experience mainly focused on the front-end side. Most of my projects were based on **AEM Sites and AEM Forms.**

`JSON` `React` `AEM` `JAVA` `HTML` `CSS` `JavaScript` `Node`

2019 > 2024
Developer and Graphics Designer
Freelancer

Graphics Designer
Responsible for the creation of a logo, branding and web page structure for a start-up related to the labor market.

Software Developer (Software Video Editing Tool):
Creation of a Python application for a local Television capable of autonomously extracting data relating to Boulder competitions on the FASI website and translating them in an XML format usable in live television via their mixing software.

Prop Tech (TV Prop)
Creation of a MIDI interface tool for use in the television program "Officine Lapola", allowing the program host to interface live with the audio mixing software.

`Figma` `Illustrator` `Photoshop` `HTML` `CSS` `React` `C` `C#` `Arduino` `PHP` `SQL` `Node` `JAVA` `JSON` `JavaScript` `Python`

Background and personal skills

I am a native Italian speaker but I am fluent in English, with a B2 certification.

Most of my work experiences (and often personal ones) have placed me into situations where the ability to adapt to different environments and circumstances was crucial.

I have been able to manage a team of 7 people, achieving outstanding results, and, during my University years, I have often found myself in situations where I was asked to be the leader of group projects where, along with my colleagues, we obtained top marks.

Throughout my career, the ability to relate to customers and the ability to speak in public, clearly and in an entertaining way, have been fundamental.

Hobbies

Other than computers, which started my working career, I am passionate about creative arts such as **music, video and graphic design** (this CV was made from the ground up on **Figma**).

I can play the guitar, bass and keyboard, which I use to produce original songs, taking care of the production part using various DAWs.

I know how to move behind a video camera, after having directed amateur short films.

I am a Ferrari fan and I love Formula one.
